RE: TPAMI-2021-04-0500.R1, "Aligning Source Visual and Target Language Domains for Unpaired Video Captioning"

Manuscript Type: Regular

16-Nov-2021

Dear Mr. Liu,

Congratulations! I am pleased to inform you that your paper has been accepted with no further changes as a Regular Paper in an upcoming issue of the Transactions on Pattern Analysis and Machine Intelligence.

Please note, IEEE authors now have the option to upload algorithms associated with their article to the Code Ocean platform, where users can share and run algorithms in the cloud. The algorithms will be linked to the final, published article in Xplore, and users will then be able to run them. Algorithms may be uploaded at article submission, revision, or after acceptance. For more information, see our FAQ at <http://ieeexplore.ieee.org/code-ocean>.

To upload your algorithm, please visit the Code Ocean site at <https://codeocean.com/ieee/signup>.

Please submit all final files through the Awaiting Final Files queue in your Author Center on ScholarOne Manuscripts. Please upload all files in a single session, and make sure your final package is correct and complete upon submission. Once you have completed the submission of your final files you will not be able to make any changes until you have received the page proofs from IEEE. A detailed list of the required files is below.

Please be advised that this journal follows a preprint model. This means that the current accepted version we have on file will be downloaded from ScholarOne Manuscripts and will post to IEEE Xplore 5-7 days from when we receive your final materials. Preprint versions are fully citable. You may not make any unauthorized changes to your manuscript at this time. IEEE will perform a comparison of your accepted paper to your final submission, and any changes outside of what the editor has requested will need to be justified and approved before publication, causing delays. This includes any changes to the author list, content, or references. Any typographical errors can be addressed with the production editor during the proof stage, and your copy-edited version will replace the preprint version online when you have finalized the proofs. In addition, the source files requested below must match the accepted PDF we have on file. Any subsequent PDF files will not be used for production.

If for any reason you would prefer not to have your paper posted as a preprint, please email jarnold@computer.org prior to submitting your final materials through ScholarOne Manuscripts; otherwise, not responding indicates your acceptance of our policy.

The final items required for publication are:

- 1) A Latex or Microsoft Word application file. This should include keywords/index terms, and bios and photos if you are including them. The contents of this file should match the accepted PDF. Failure to submit a source file may result in publishing delays.
- 2) If your figures are not embedded in the source file of your manuscript, you will also need to upload separate figure files. The acceptable formats are Word, eps, ps, tiff, ppt, png and excel. We do NOT accept jpeg files for figures.
- 3) Biosketches and photos of all authors. Biosketches should be uploaded at the same time as the other final files, if you plan to include them. These can be included at the end of your Microsoft Word or Latex source file, or submitted as a separate upload. For author photos jpeg files are accepted.

NOTE: If one of your authors does not want a photo published, please upload a document explaining this to avoid publication delays with your article.

Please make sure that all files have unique file names in order for them to export successfully to IEEE

Additional information (including our strict size limitation for all accepted articles) can be found by visiting: <http://www.computer.org/portal/web/peerreviewjournals/author#final>.

We encourage you to post about your published article on social media. [Read our tips for crafting an effective social media message about your work.](#)

Thank you for your contribution to Transactions on Pattern Analysis and Machine Intelligence. We look forward to seeing your final files soon.

Thank you,

Mrs. Joyce Arnold, Administrator, on behalf of:
Sven Dickinson, EIC
Transactions on Pattern Analysis and Machine Intelligence

Editor's Comments:

Associate Editor

Comments to the Author:

The paper has undergone one revision. After the revision two reviewers recommend acceptance with no further changes, one reviewer recommends acceptance after some improvements to the writing style and typos.
